

## KNEPT BOSORBENT SPRAYER

The self-contained knapsack sprayer is designed for mechanization of work on the application of biosorbents of the “Econadin” type to the surface (water, land) contaminated with oil and other petroleum products.

### FEATURES:

The Econad sprayer is characterized by increased autonomy, high productivity and is designed to provide maximum operator convenience. Distinctive features of the Econad sprayer are easily accessible control knobs, a spacious tank for biosorbent and fuel, as well

as the ability to regulate the consumption of biosorbent.

Color: yellow, blue
