

SPRING SKIMMER "MINIBAGGER"

The **Minibagger** is a highly efficient, cost-effective rapid response tool for localized oil spills in coastal areas, lakes and ports.

SeaHow's patented invention, the Minibagger Comb Brush, picks up both heavy and light oils extremely efficiently. With the Minibagger, you can even collect diesel fuel from the water surface using any watercraft.

The robust aluminum outrigger is equipped with a wheel at the end for easier and more efficient collection of oil products from the walls of berths and sides of ships.
