

## Foam Wall Containment Berms

for Fast, Drive-Through  
Spill Protection

Discover **ECONAD Foam Wall Containment Berms** — quick-deploy, drive-over spill barriers designed for safe containment during fuelling, washing, and liquid transfer operations.

Foam Wall Containment Berms are a smart, flexible solution for quick spill response in areas with vehicle or equipment movement.

Designed with low-profile foam sidewalls (typically 2–4 inches / 50–100 mm high), these berms allow for easy drive-in and drive-out access while maintaining reliable containment of hazardous liquids such as oil, fuel, and chemicals.

ECONAD's foam wall berms combine portability, durability, and compliance, making them ideal for industrial facilities, transport hubs, construction sites, and emergency response teams.

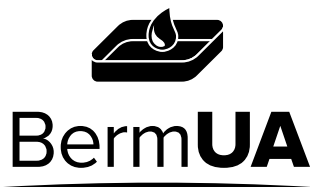

### KEY FEATURES AND BENEFITS:

- **Drive-over access:** Soft foam walls (2–4 in / 50–100 mm) allow vehicles to pass without the need for manual setup.
- **Quick deployment:** No tools required — set up in minutes.
- **Compact storage:** Lightweight and rollable for field transport or mobile use.
- **Durable materials:** Made from chemical-resistant PVC, ranging from 22 oz to 32 oz (745–1085 g/m<sup>2</sup>).
- **Reusable:** Designed for multiple uses in tough environments.
- **Custom sizing available:** Standard and made-to-order dimensions up to 20 ft × 50 ft (6 × 15 m) or more, with foam wall heights adjusted to client needs.
